

## The 3d-Putter goes on tour...

**Vienna.** The revolutionary 3d-putter made in Austria will be seen on the Pro Golf Tour in 2015. Youngster Benjamin Weilguni from Lower Austria will – with the help of Wiesberger-coach Phillipe de Busschere - attempt to gain a ticket to the Challenge Tour using the new putter. In 2014 Weilguni started on the EVOLVE Tour in Spain and made it all the way to fifth and fourth place.

According to Weilguni the 3d-putter's outstanding feature is its unique touch. He is also impressed by its various adjustment possibilities. And he says: "really an awesome product"!

Zukunftshoffnung Benni Weilguni.
